

## **Product Detail**

### **Biqi**

#### **Basic Information**

Biqi ® smectite powder is a class IV national new drug manufactured by Simcere (Hainan) Pharmaceutical Company.

National Approval Certificate Number: H19990307

Simcere (Hainan) Pharmaceutical Company is the first enterprise of Hainan Province to have passed the national GMP validation enterprise. It has been granted the title of "prominent high-tech enterprise of state torch project" in 2003.

Biqi ®smectite powder is a natural substance which acts as enteric pathogen elimination and mucosa protection agent. The advantage of Biqi is characterized as the dual effect of enteric mucosa protection from pathogen insult meanwhile facilitates mucosa repair and regeneration plus the immobilization and clearance of various stimulant factors.

#### **Mechanism of Action**

The natural smectite powder has a dioctahedral layer structure and uneven electrical charge distribution which will potently immobilize and eliminate viruses, germs and toxins, gases produced inside the alimentary canal. When covers over the enteric mucosa surface, it protects the mucosa from pathogen insult meanwhile facilitates mucosa repair and regeneration. It balances the enteric flora and promotes homeostasis and blood clotting.

#### **Pharmacokinetics**

Two hours after oral administration, the drug covers up the entire intestinal surface. Six hours after administration, the drug is eliminated out of the body along with the absorb viruses, germs and toxins. It doesn't enter the circulation and is not metabolized in vivo.

#### **Indications**

Chronic or acute diarrhea in adults or children, Esophagitis, gastrogitis, Gastroesophageal reflux disease(GERD), gastric ulcer, duodenal ulcer, Ulcerative Colitis, IBS (irritable bowel syndrome) etc.

#### **Contraindication**
